We want to choose the subject from elective courses and skill enhansmwnet course

A elective course can be included which can expose students more to industrial applications and career options.

Second semester was much better as compared to the first in terms of subjects, syllabus, and the whole learning experience. However the duration of the semester felt to be too short to cover the entire syllabus as teachers took extra classes to cover it as well as students had a burden till the end of the semester. Either the syllabus should be reduced or the semester should be extended so that both teachers and students get sufficient time to cover the syllabus. Also, the practical aspects should also be focused more. Practical classes should be taken more regularly and with sincerity as practical knowledge is more important as compared to theoretical knowledge when it comes to pursing a master's degree. I hope this is acknowledged so that our juniors get a better experience.

No

Please, We need offline classes more than online classes.....I think Bioinformatics in this department is side lined. Want Better bioinformatics labs. And most important we want faculties (offline faculties) within time . Who can teach us full syllabus with both practical and theoretical knowledge. Main concern is faculties.

WIFI speed or WIFI work not properly in Summer department AC not working
major problem student face kindly request to resolve this problems....

no
