Suggestions/ comments, if any

5 responses

The practicals are not done properly , since we are msc students and not in our bachelors degree we must do every experiment and lab work individually but keeping that afar in this sem we didnt even get to do anything in the lab .

I believe that in the last sem atleast, we get to do practicals individually in the lab and we really learn to handle equipments that we dont know .

At time of viva teachers say that they taught everything but some subjects like rdt, genomics and proteomics and cancer .. even though they were easy but we havent got any grasp over those subjects .

Practicals and lab activities should be conducted more appropriately so that every student is able to perform and have knowledge of the experiments being performed

No

All over, The 2sem was quite lengthy but it's super interesting and gave me a lot of knowledge..

no
