Report on Cleanliness Drive 2024

On Wednesday, October 2<sup>nd</sup>, 2024, the School of Biotechnology at DAVV organized a Cleanliness Drive inspired by the principles of Mahatma Gandhi, who championed the importance of cleanliness and hygiene.

The day commenced with our esteemed Head of Department, Dr. Hamendra Singh Parmar, leading by example as he was the first to begin cleaning the campus grounds. His initiative sparked enthusiasm among the staff, PhD scholars, and students from both the M.Sc. 3<sup>rd</sup> Semester and M.Sc. 1<sup>st</sup> Semester programs, all of whom joined in with great energy.

Participants were organized into teams and assigned specific areas to clean, including corridors, laboratories, and classrooms. Within a short time, the campus grounds were transformed into a cleaner and more inviting environment.

After completing the cleaning activities, everyone gathered to celebrate their hard work with refreshments. The participants shared laughter and stories as they enjoyed this well-deserved meal together. This moment of camaraderie not only provided a satisfying end to a productive day but also strengthened the bonds among students, faculty, and staff, creating lasting memories of teamwork and community spirit.

The event not only fostered a sense of community and teamwork but also reinforced the importance of maintaining cleanliness in our surroundings. The spirit of collaboration and dedication was evident, making the Cleanliness Drive a resounding success.
