

Seminar on “Microarrays”, 28th August, 2019

A seminar on microarrays was organized at 3:30 pm on 28th August, 2019. Dr. Paras Yadav (Technical Scientist) and team from Agilent Technologies, Inc. addressed the attendees on the role of microarrays in scientific work, especially in the fields of genetics and medicine. Purpose, functions, applications and advantages of microarray technologies were discussed on, and the attendees eagerly participated in the seminar and clarified their doubts via questions. Dr. Yadav also explained how the products and services of Agilent Technologies, Inc. provide scholars with myriad opportunities, including help in designing and patenting their own gene sequences. Dr. Hamendra Singh Parmar of the School of Biotechnology, DAVV explained to the attendees about the working principle and the importance of such highly advanced technological instruments in our departmental laboratories. The seminar was attended by M.Sc. students, research scholars and faculty of SBT. The event was concluded with a note of thanks by Dr. Parmar and a hearty round of applause from the attendees, around 5:30 pm.
