

As a part of the Induction program for the incoming batch of 2019, on 20th August a seminar was conducted at School of Biotechnology, DAVV, Indore. It was spearheaded by Dr. Ram Kumar Singh, an alumni of the School of life Sciences, DAVV, Indore. The seminar started with welcome and a brief introduction of Dr. Ram Kumar Singh by HOD Dr. Anjana Jajoo. He is currently based in Texas, USA and is affiliated with the MD Anderson Cancer Center. Through his lecture, he threw light on recent research related to "Multiple myeloma and its cure." He explained the basic symptoms of multiple myeloma, present treatments and problems associated with them. The students were brought up to speed with how he currently working on HDP101 which is an experimental drug that they are using to cure multiple myeloma. He also discussed the scope of research in Biotechnology, and genetic engineering. The attendees were bundles of curiosity and had several questions to which he responded accurately and with a lot of patience. It was attended by all M.Sc students, research scholars and faculty of SBT. In the end, Dr. Anjana Jajoo thanked him for sparing time to deliver lecture and interacting with students of SBT.
